

## MATLAB PROGRAMMER

Harp Technologies Ltd (founded in 2007) is located in Otaniemi, Espoo, Finland. Our main business is RF and microwave design and development for space, remote sensing, defence, and telecom/IoT applications. Our customers include leading companies and public organisations, e.g., the European Space Agency (ESA). **We are now looking for a Matlab Programmer** (B.Sc., M.Sc, or higher) for our customer R&D projects. The employment would be full time and fixed-term or permanent, depending on the profile of the candidate. The role (design engineer, Snr. design engineer, specialist, ...) would depend on the experience and qualifications of the candidate.

### REQUIREMENTS:

- Studies and/or work experience in electrical/software engineering
- Experience of working in Matlab environment and developing tools for it
- Above-average study grades or otherwise proven excellency
- Fluent English skills (both spoken and written)
- Existing eligibility to work in Finland (e.g., EU/EEA citizenship or existing work permit)

### WE VALUE ALSO:

- Understanding of signal processing and signal modelling
- Studies and/or work experience in one or more of the following fields:
  - HW engineering (RF, microwave, electronics, mechanical, thermal)
  - Software development and validation
  - Spacecraft engineering, dynamics, and mission modelling
  - Remote sensing
- Project management and/or leadership experience
- Finnish skills

### WE OFFER:

- Most inspiring field of work
- Up to date working tools and measurement equipment
- Possibility for professional growth in international R&D projects
- Good leadership and enthusiastic, highly professional team

Please email your one-page application by **January 20, 2019** to [careersharp\(AT\)harptechnologies.com](mailto:careersharp(AT)harptechnologies.com). As appendix, please enclose your CV (and programming portfolio, if applicable) and a copy of your university diploma / transcript (with grades). You can also send your application by regular mail.
